Response to Amendment

1. This office action is in response to applicant's amendment received on 9/27/04. Claims 1, 15, 20, and 23 have been amended and claim 18 has been canceled. Claims 1 - 17 and 19 - 23 are pending on this application.

Allowable Subject Matter

2. Claims 1 - 17 and 19 -23 are allowed.

3. The following is an examiner's statement of reasons for allowance:

With respect to claims 1, 15, 20, and 23, in addition to other elements in the respective claims, the prior art of record fails to teach or suggest "a magnetic flux absorbing layer having an isotropic response to magnetic fields disposed between at least two bit cells of the plurality of bit cells".

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Tran et al. (Patent No.: US 6,504,221 B1) discloses a sense layer has a magnetization that can be oriented in either of two directions: the same direction as the pinned layer magnetization or the opposite direction of the pinned layer magnetization.

Zhu et al. (Patent No.: US 6,211,559 B1) discloses a first and second magnetic tunnel junctions each including a pinned magnetic layer, an insulating tunnel layer, and a free magnetic layer stacked in parallel to allow tunneling of

electrons through the insulating tunnel layer between the pinned and free magnetic layers.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
